

## WARREN'S LAND BILL ENDORSED

Donation of Million Acres to  
Wyoming for Road  
Construction Recommended.

### FURTHER EXPERIMENT

Utah, Nevada and Other In-  
termountain States to Re-  
ceive 250,000 Acres.

Washington, Sept. 30.—The Interior department, in reporting today on Senator Warren's bill to donate a million acres of public land to the states of Wyoming to be sold or leased by the state to aid in the construction and maintenance of public roads, endorsed the principle of the bill and recommended that as an experiment 250,000 acres of land be donated for public road aid to each of the states of Wyoming, Colorado, Utah, Arizona, Montana, Idaho, New Mexico and Nevada.

The department recommends that the lands be sold at not less than \$4 per acre which would give each of the states \$1,000,000 for roads work, or, if leased, that a rental be fixed which would give the state an income equal to about 5 per cent of the value of the lands.

It is suggested that the administration of lands donated be placed in the hands of the governors and land boards of the respective states and the lands disposed of under rules and regulations to be prescribed by the Interior department.

Bills similar to the Warren bill have been introduced granting from 1,000,000 to 2,000,000 acres to their respective states by Senators Shafroth of Colorado, Smoot of Utah, Pittman of Nevada, Ashurst of Arizona and Catron of New Mexico. It is believed that the senate public lands committee which has the various bills under consideration will adopt the recommendation of the department.

**NEARS HUNDRETH  
MILESTONE OF LIFE**  
Logan, Sept. 30.—Mrs. Elizabeth H. Hyde of 239 North Third East street will celebrate her one-hundredth birthday anniversary on Thursday next. Her relatives plan to make of it a great occasion and to that end will have open house during the afternoon of that day, and everybody is invited to visit the residence and shake hands with the "oldest inhabitant." Mrs. Hyde is an interesting character. She is as bright mentally as the ordinary person of half her age, and in addition has a wonderful memory. She recalls without the slightest difficulty or hesitation incidents of seventy years ago when she was in Nauvoo, Ill., and also the striking events in the early history of Utah.

When a newspaper representative visited her today she told of some of her experiences, remarking that while she had seen much trouble and sorrow in her time, she had resolved never to fret, and to that fact she attributes her advanced age. She is devoted to poetry and gave as her favorite poem the one commencing "Laugh and the world laughs with you weep and you weep alone." She speaks distinctly, hears well, sleeps like a child and has a hearty appetite. Her sight began failing last spring and now she can see but little.

Elizabeth Howe Bullard Hyde was born in Holliston, Middlesex county, Massachusetts, on October 2, 1813, being the daughter of Joel and Lucretia M. Bullard. In 1842 Mrs. Hyde was married to William Hyde, a member of the Mormon battalion, and one of the founders of the town of Hyde Park in this county. They came to Utah in 1849.

### NORTHLAND'S SONS REMEMBER "ZION"

Salt Lake, Oct. 1.—Scandinavian members of the Mormon church residing in this city held a general meeting in Assembly hall last night, with Anthon H. Lund of the first presidency of the church in charge. There was good singing by the Scandinavian choir of the Salt Lake stake, with Nels Moreck directing and Miss Levon Johnson at the organ console. The meeting was held in commemoration of the arrival here sixty years ago of the first emigrant company from Scandinavia. These pilgrims had been ten months on the way from their native land. They had encountered heavy storms at sea and endured many other privations while making their journey to the edge of the western desert. Then they made a trip of 1300 miles by ox team, reaching Salt Lake September 30, 1853.

These men and women went down to Sanpete county, setting first at what is now Spring City, then called Allred's settlement. Afterward it became known as Little Denmark; but the Indians drove them out from the place and they shifted to what is now Ephraim. These events were described by the speakers.

Principal speakers were President Lund and Andrew Jensen. In his address President Lund related in Danish, the experiences of himself and many of his fellow Scandinavians from their first association with the church, going over scenes attendant upon the early settlement of Sanpete and Sevier counties and other portions of southern and central Utah.

Andrew Jensen was introduced as the early church emigrant from Scandinavia to this territory. Mr. Jensen spoke in the Danish tongue and reviewed the history of the Scandinavian mission and that of the Mormon church generally, describing the advent of the pioneers in this valley and the march of the Mormon battalion to California. The speaker showed the prominent part taken by Scandinavians in all the important events which he recited as characterizing the history of the church. He read excerpts from Morgenstjern (Morning Star), the official Scandinavian mission publication, in confirmation of his presentation.

**DOUBLE CHARGE IS  
HOLDING THREE MEN**  
Pocatello, Idaho, Sept. 30.—As a sequel of the robbery of State Streets Saturday morning, at a lunch counter in the Flatiron building, the proprietor, William Edwards, A. R. Richards, the cook, and William Edgington, who frequented the resort, are in jail with the charges of assault with a deadly weapon and robbery hanging over their heads. State's Attorney has recognized all the prisoners as the men who robbed him and beat him and then threw him out in the alley.

State's Attorney says he was served several drinks by Edgington regardless of the fact that Richards was posing as a deputy sheriff. As Edgington was serving the drinks Edwards struck him on the back of the head with a billiard cue. He was hit several times and knocked to the floor. After being robbed he was dragged out in the alley. State's Attorney saved about \$200 by stuffing some large bills in his mouth. Florence Anderson has been arrested as an accomplice and other arrests are expected. So far the cache of the money has not been found although \$115 was found in the room of a woman friend of Richards and Edwards.

William Green, a patrolman of the Pocatello police, was implicated in the robbery in a confession made by one of the alleged robbers. Green was arrested today by the sheriff and later was released from police duty pending an investigation.

## ANALYSIS OF COAL IN VARIOUS FIELDS

Washington, Oct. 1.—In the examination of various coal fields of the United States during 1912 by the United States geological survey, a large number of coal analyses were made for the purpose of determining, if the land was a part of the public domain, the value of the land underlain by the particular coal bed sampled, and in other areas to furnish information to the general public concerning the fuel resources of the country. These analyses have been grouped by states and are now available in a pamphlet published as advance chapter M from Bulletin 531, which may be had on application to the director of the survey at Washington.

In taking a sample of coal for analysis the geologist is instructed to make every endeavor to procure fresh unweathered material. He is supposed to face up the bed in the mine or prospect until fresh material is available, and then to obtain his sample by making a uniform cut across the bed from roof to floor, including all such benches and partings as an experienced and careful miner would include in commercial coal and throwing out such impurities as would certainly be excluded in practical operation.

He is supposed to cut sufficient coal to give at least 6 pounds per foot of coal bed sampled. The sample is hastily pulverized in the mine until it will pass through a 14-mesh mesh, and then is quartered down until about 4 pounds remain. This is placed in a salvanized iron can, sealed with adhesive tape or paraffin, and mailed to the laboratory for analysis. The sampling is done on the principle that a coal mine should be sampled as carefully as a gold mine, and that the sample should be even more carefully handled after it has been taken. The object of sealing is to prevent change in the moisture content, so that the coal may reach the laboratory in practically the same condition that it exists in the mine.

## MAYOR A. G. FELL IS A CANDIDATE FOR RE-ELECTION

Mayor A. G. Fell yesterday announced his candidacy for mayor-commissioner in the following open letter to the taxpayers of Ogden City:

"To the Taxpayers of Ogden City: At the earnest solicitation of many friends, I have concluded to offer my services as a non-partisan candidate for mayor-commissioner. After a residence of more than forty years in the beautiful and prosperous city of Ogden, in which I am considerably interested, practically all of my interests being here, during which time my life has been an open book, my fellow citizens have had ample opportunity to judge of my general character.

"It is the pleasure of the voters of Ogden City to re-elect me to the honorable and responsible position of mayor-commissioner, my best efforts shall be put forth to advance the interests of our city in all respects. "The matter of a ample supply of good, pure water for our citizens is paramount. At the same time, in our anxiety to build the dam in South Fork to impound ample water to carry us over the dry season, we must not overlook the elements of safety. "Every detail of the dam must be worked out, passed upon and approved by engineers of recognized ability before the structure is commenced. This is a matter of vital importance and must have the most careful thought and consideration. (Signed) "A. G. FELL."

**SEEMINGLY PREFERS  
DEATH TO ARREST**  
Salt Lake, Oct. 1.—After hearing that a warrant had been issued for his arrest on a charge of neglect of his three minor children, Edgar Johnson, 31 years of age, drank poison in a rooming house at 152½ South Street shortly before 8 o'clock last night. He died in the emergency hospital at police headquarters an hour later.

Johnson had been employed as a teamster for a contractor, F. H. Luce, of 851 East Fifth South street. For some time Johnson had been separated from his wife, who with their three little children lives on Lake street, and supports herself by working in a laundry. Johnson engaged a room where he took the poison several days ago. Last night Mr. Luce accompanied Johnson to the room. The poison was made that he should send out for a bottle of beer. Johnson agreed, then suddenly drew forth a bottle and drank half the contents when Luce saw the poison label on it and knocked it out of Johnson's hand.

Suffering from the effects of the drug, Johnson was removed to the emergency hospital by Police Inspector C. A. Carlson and Detective W. C. Zeese, who answered an emergency call. Dr. Hardie Lynch was called but found that the man was too far gone to respond to stimulants or antidotes. The body was removed to the undertaking rooms of Joseph William Taylor to be prepared for burial.

Johnson was a native of Salt Lake, having been born here July 19, 1882. He was a son of James and Christian Johnson.

**MUCH INFORMATION OBTAINED.**  
Paris, Sept. 30.—Much information was obtained, despite the difficulties encountered in the Balkans, by the commission appointed by the Carnegie peace foundation to inquire into

the alleged violations of the laws of war during the late Balkan war and also into the economic consequences of the conflicts. The commissioners are meeting here under the presidency of Baron d'Estournelles de Constant, to arrange their report, which is to be published shortly.

### FALLS FROM LADDER, BREAKS NECK, DIES

Salt Lake, Oct. 1.—Cyrus Robert Jump, aged 65 years, was almost instantly killed yesterday shortly after noon when he fell from a tree in the rear of his home, 1029 Harvard avenue. The aged man had been standing on a ladder picking pears for about an hour when the accident occurred. At about 11:45 o'clock, his wife, who was in the kitchen only a few feet from the tree, heard a scream of pain. She ran to the back door and saw her husband doubled up on the ground with the fallen ladder beside him.

"Are you hurt, dad?" she asked as she bent over him. "My back is hurt," he replied. These were his only words and he died within a few minutes as he was being carried by neighbors into the house. A doctor who was called declared death was due to a broken neck. No one saw Mr. Jump fall, but it is supposed the ladder upon which he was standing slipped and he fell about ten feet.

Mr. Jump's son, Glenn A. Jump, an employee of the Oregon Short Line Railway company, was notified of the accident and hurried to his home. The body was removed to the Qualtrough-Alcott undertaking establishment. Funeral arrangements have not yet been completed, but the services will be held in the Liberty Park Methodist church, The Rev. D. E. Carter will be in charge.

Mr. Jump was a native of New York and he and Mrs. Jump came from the east a year ago to make their home with their son. He was born April 4, 1848, in Putnam, N. Y., and is survived by his widow and two sons, Glenn A. Jump of Salt Lake, and R. B. Jump of Mount Vernon, N. Y.

## LAND RESTORED TO THE PUBLIC DOMAIN

Washington, Oct. 1.—Three quarters of a million acres of public lands were restored to entry last month. These restorations were based upon recommendations made by the United States Geological Survey as a result of its classification work in the Western States. The only area withdrawn was one of 235 acres in California, temporarily reserved from entry because of its possibilities for developing water power. The largest restoration was in Montana, where 525,747 acres were restored to public entry as the result of coal classifications completed. In addition to this, restoration of coal land involving 217,742 acres were made in Colorado, New Mexico, North Dakota, Utah, and Wyoming. In California, Idaho, Oregon, and Washington 7,824 acres heretofore reserved for water power were restored, examination having indicated that they are not valuable for the purpose for which they were withdrawn.

About \$3,600,000 acres of land have now been classified as to their coal content, 61,484,032 acres have been classified as non-coal land and less than 20,000,000 acres have been classified as coal land and values of over \$760,000,000 placed upon them in accordance with the provisions of the coal-land law and the Department regulations. The remainder has been restored without classification.

The survey has also classified as non-irrigable and designated for entry under the enlarged homestead acts more than 200,000,000 acres of lands in those Western States to which the 320-acre homestead principle has been extended by Congress.

### TALLMAN SMOOTHING OVER DEMOCRATIC RIFLES IN WEST

Boise, Ida., Sept. 30.—Clay Tallman, commissioner of the general land office, is in Boise, ostensibly to look after the United States land office in the state, but in reality to check up on political conditions, particularly as they affect federal appointments. On Monday evening the commissioner had a long conference with Governor Shoup and former United States Senator Perky, who represent one faction of the party. Tonight he was closeted with John F. Nugent, Frank Martin, J. T. Pence, Frank B. Kenyon and several other members of the other factions.

The fact that Commissioner Tallman has been in conference with the local leaders of both factions leads to the conclusion that the men higher up in Washington are trying to force a compromise. Some of the big appointments are expected this week. Commissioner Tallman will go from here to Salt Lake, and it is presumed that his mission there will be largely political, as well as here. He admits that he is eager to get political information for the information of his superiors.

## ATTENDING THE PAINT CONVENTION

Manager W. H. Harris of the Ogden Paint, Oil & Glass company, is attending the National Paint convention at Minneapolis, Minn., which is now in session. Mr. Harris was accompanied on the trip east by Harry Shepard of the Salt Lake Glass & Paint company.

After the adjournment of the convention, Mr. Harris will spend several weeks on the eastern coast, combining pleasure with business.

### SENATOR LODGE IMPROVING

Nahant, Mass., Oct. 1.—United States Senator Cabot Lodge passed a quiet night and the nurses said today that he was resting comfortably. His pulse and temperature were normal. Senator Lodge was operated on last week for gastric ulcer.

You'll always find an appreciative listener when you abuse somebody.

## HIGH DIVER HAS NARROW ESCAPE

Spectators at State Fair See  
Life Miraculously Saved  
Twice in One Minute.

Salt Lake, Oct. 1.—Walter Barker, high diver and human torch, at the Utah State fair, had a narrow and as spectacular an escape from death last night as a man could have. That he did not break his neck, or every bone in his body, in front of a large crowd of spectators gathered to watch his feat, was a marvel.

Barker and his wife, Annette, perform diving feats in front of the coliseum twice each day. The afternoon performance went perfectly, though the thrills offered are enough to satisfy anyone. At 10 o'clock last night, Barker went to the top of a high, steep incline from which he glides down at a terrific speed on roller skates and leaps through the air into a tank of water.

To make the night performance more spectacular the diver dressed in a rubber suit. Over this is placed a paper suit, soaked in gasoline. Gasoline is also poured over the surface of the tank of water below. When the signal is given a torch is touched to the water surface and the gasoline is ignited. Flames leap ten feet into the air and completely cover the water. At the same instant an attendant lights the paper suit on the diver above and he starts down the incline on his perilous leap through the flames into the water, himself enveloped in a suit of flames.

**Board Cracks.**  
An instant after Barker started on his wild dash down the incline last night—when he struck the curve at the end of the incline—the spectators were horrified to hear a board crack. Before they could realize what had happened the diver turned a complete somersault in his flaming suit and landed flat on his back, head down, against the earth embankment around the edge of the tank. That earth embankment and the flat position in which Barker was fortunate enough to fall was all that saved his life. A foot higher and his body would have been dashed at a terrific speed against the solid woodwork of the tank and he would unquestionably have met instant death.

Barker was stunned by the fall. Several spectators rushed to his side and made frantic attempts to extinguish the flames, which still threatened to burn him seriously. They slipped him with coats and pieces of cloth, but no one seemed to think of hurling him into the tank. As the fire began to lick at his face the stinging brought Barker to consciousness. He jumped to his feet and leaped, a human torch, through the fire that still covered the surface of the tank and disappeared into the water below. His life was saved for the second time in one minute.

### RAPID PROGRESS ON MOFFAT ROAD

Denver, Sept. 30.—Newman Erb, president of the Denver & Salt Lake Railroad company, left for New York tonight after having settled all remaining details of the contract between his company and the Moffat tunnel commission for the joint construction of the James Peak tunnel. The contract will be forwarded to Mr. Erb as soon as it has been printed, and will be taken up by the directors of the road at a meeting next Monday. If then approved, it will be returned to the commission and plans will be laid for calling an election at which the \$3,000,000 of city bonds will be voted upon.

Mr. Erb announced that the road would be completed to Hayden, Routt county, next Monday and that the new terminus at Craig, Moffat county, would be reached November 15. General Manager Morse, who accompanied Mr. Erb and the tunnel commission, reported that the extension was making fast progress.

The scarcity of labor, which has hampered the track laying, has been alleviated since the inception of the coal strike, many of the miners who have become idle having joined the railroad forces.

### POTTERY INDUSTRY

Washington, Oct. 1.—The pottery imported into the United States in 1912 was valued at \$9,555,530, but the domestic production, according to the United States Geological Survey, was valued at \$36,504,164. The exports were valued at \$1,177,734. The domestic production was 81.4 per cent of the total consumption against 78.9 per cent in 1911.

is a curable disease, which requires treatment. The ORRINE treatment can be used with absolute confidence. It destroys all desire for whiskey, beer, or other intoxicants. Can be given in the home. No sanitation expense. No loss of time from work. Can be given secretly. If after a trial you fail to get any benefit from its use your money will be refunded.

ORRINE is prepared in two forms: No. 1, secret treatment, a powder; ORRINE No. 2, in pill form, for those who desire to take voluntary treatment. Costs only \$1.00 a box. Come in and talk over the matter with us. Ask for booklet A. R. McIntyre, Drugs 2341 Washington Ave.

### LEGAL

#### NOTICE TO CONTRACTORS.

Scaled proposals for building sewers in Sewer District No. 119, being Hudson avenue from 22nd to 24th streets; and Lincoln avenue from 19th to 20th streets, under plans and specifications prepared by the City Engineer and approved by the Board of Commissioners, will be received at the office of the City Engineer in the City Hall at Ogden, Utah, until 10 o'clock a. m., on the 6th day of October, 1913, at which time all proposals received will be publicly opened and read aloud. Plans and specifications can be obtained upon application at the office of the City Engineer after September 29, 1913.

The right is reserved to reject any or all bids and to waive any defects by order of the board of Commissioners.

H. J. CRAVEN,  
City Engineer.

First publication September 12, 1913.  
Last publication October 4, 1913.

#### NOTICE OF INTENTION.

Notice is hereby given by the Board of Commissioners of Ogden City, Utah, of the intention of said Board to make the following described improvements, to-wit:

To create Ballantyne avenue from 20th to 21st streets for a distance of 750.0 lineal feet, as a sewer district, and to construct therein a pipe sewer together with the necessary manholes, and to connect all with the manholes of the present sewer system, and to defray the whole of the cost thereof, estimated at \$900.00 by a local assessment on the lots or pieces of ground lying and being within the following district, being the district to be benefited or affected by said improvement, viz:

All the land lying between the outer boundary lines of said avenue and a line drawn 132 feet outward from and parallel to the said outer boundary lines. Said district to be assessed for the cost of putting in the sewer between 20th and 21st streets on Ballantyne avenue.

Any objections and objections to the carrying out of said intention must be presented in writing to the city recorder on or before the 2nd day of October, 1913, at 10 o'clock a. m., that being the time set by said Board of Commissioners when they will hear and consider such objections as may be made thereto, at the mayor's office at the city hall, Ogden City, Utah.

By order of the board of commissioners of Ogden City, Utah.  
Dated this 9th day of September, 1913.

H. J. CRAVEN,  
City Engineer.

First publication September 9, 1913.
